

I claim:

1 1. An integrated S-video and composite video terminal assembly for an
2 electronic device, comprising:
3 a socket having first and second sets of inlets, the first set of inlets
4 compatible with a standard S-video terminal and the second set of
5 inlets for carrying a composite video signal;; and
6 an adaptor having first and second terminals, the first terminal configured to
7 mate with the socket and couple to the second set of inlets, the second
8 terminal coupled to the first terminal and compatible with a standard
9 composite video terminal.

1 2. The assembly of claim 1, wherein the second set of inlets include a
2 ground conductor and a composite video output conductor.

1 3. The assembly of claim 1, wherein the first and second terminals of the
2 adaptor are connected by a cable.

1 4. The assembly of claim 1, wherein the first set of inlets of the socket are
2 coupled to a video processor for receiving an S-video signal.

1 5. The assembly of claim 1, wherein the second set of inlets of the socket
2 are coupled to a video processor for receiving a composite video signal.

1 6. The assembly of claim 1, wherein the first terminal of the adaptor is a
2 male connector.

1 7. The assembly of claim 1, wherein the second terminal of the adaptor is a
2 male connector.
